Partner

Innovators by vocation

We are a network of professionals combining technological, strategic, and creative skills to shape **high-impact projects**.

We collaborate with companies, organizations, associations, and institutions to support them on their journeys of **innovation**, digital transformation and communication.

creativity & technology

About

A multidisciplinary team. A partner for **transformation**. We are designers, developers, coaches, and strategists.

Not just an agency, but an **ecosystem** of expertise serving those who want to communicate better, innovate, and engage.

Our approach? **Concrete, flexible, and cooperative**. We speak the language of creativity, but with the seriousness of those who know how to deliver results.

What makes us unique

- 
- **Integrated approach**
A single team covering technology, creativity, communication, and training, for seamless, seamless service.
 - **Cross-sector expertise**
We work with SMEs, startups, and institutional entities, in Italy and abroad.
 - **Collaborative Mindset**
We build relationships, not just projects, by immersing ourselves in your goals with enthusiasm, as if the project were our own.
 - **Project Flexibility**
Each project is tailored to individual needs, budgets, and objectives.
- 

What can we do together?

Digital solutions - Scalable tools that simplify, engage, and evolve.

- Institutional websites and interactive portals
- Mobile apps, management and custom software, service platforms
- Digital integrations and online process management

Visual Identity & Communication - It means being relevant and accessible.

- Branding, identity, and storytelling
- Communication campaigns for events, projects, and public calls
- Digital strategies, social media, and community engagement

Training and empowerment - Tools and skills to best use them.

- Workshops on digital, creativity, and innovation
- Capacity-building programs for teams and stakeholders
- Mentoring and project consulting

Reasons to cooperate with us

- **Saving time and resources**

A single point of contact for all your needs, eliminating fragmentation and dispersion.

- **Partner mentality**

We work side by side with companies, organizations, and associations to achieve common goals.

- **Cross-sector skills**

Technology, design, communication, training: all in one team, to anticipate trends with our ideas.

- **Personalized approach**

Every situation is different: together we build a customized, flexible, and shared path.

- **Design energy**

We bring method, creativity, and concreteness. Without bureaucracy, without waste.

- **Glocal vision**

We think big, we act in familiar contexts. From strategy to implementation.

Our method

We work with a simple, transparent and results-oriented approach

1 Listening & Analysis

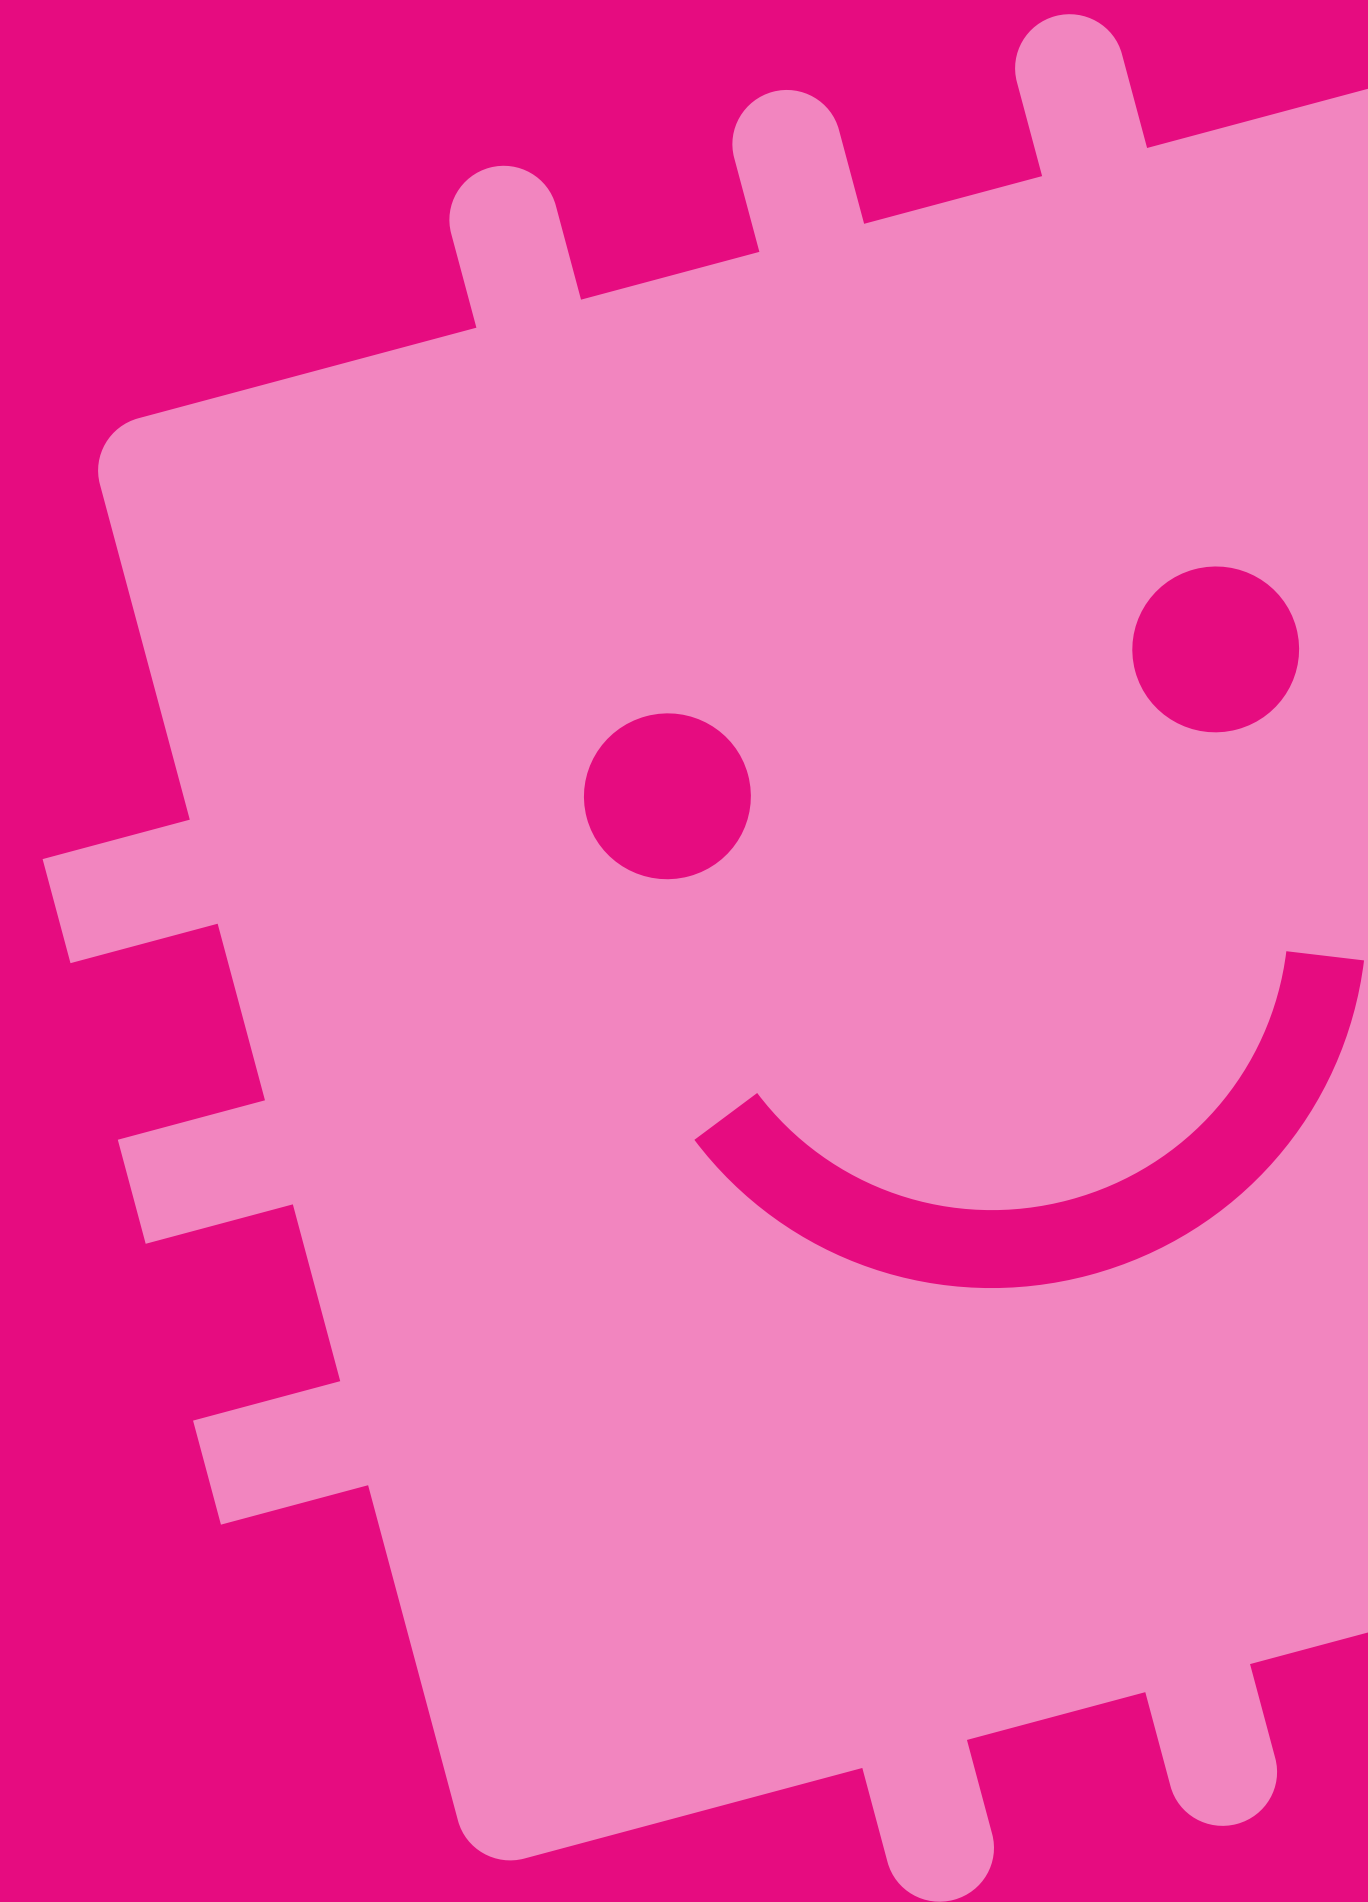

A free brainstorming session to understand needs, resources, and opportunities.

2 Planning

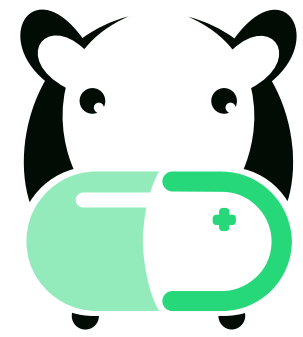

We develop a customized, sustainable and measurable plan with you.

3 Implementation and support

We deploy our team and follow the project through to completion. And beyond.

Some of our projects

IppoFarm
www.ippo.farm

Cutting-edge **Cloud** solutions for **healthcare operations**, avoiding the need of complex hardware, and allowing employees to focus on **patient care**.

IppoFarm turns data into **strategic decisions**, helping healthcare facilities improve their efficiency.

Dividendo
www.dividendo.cloud

Dividendo solves a critical challenge within the **construction industry**: obtaining a clear real-time overview of the **work progress**, simplifying management and optimizing all project phases.

The platform offers project and inventory **management** features, analysis and reporting, time, cost and progress **tracking**.

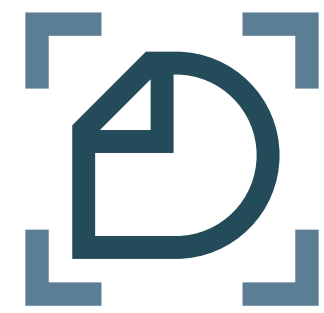

LockTime.click
locktime.click

LockTime is a web app that creates **legally valid**, timestamped proof in real time.

Using a smartphone and a REM account (Italian PEC technology), users can **certify events** by sending photos, videos, or PDFs via certified email, ensuring **traceability and authenticity** while helping reduce disputes and fraud.

Some of our projects

QRDoc
www.qrdoc.cloud

Organize, share and display your documents through **QR Codes**.

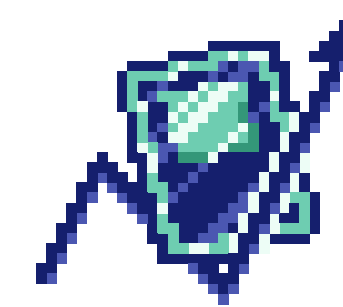

With its swift and secure system, you can access all the necessary **information** within your documents directly from your device, **reducing** the use of paper documentation.

Space4Works
www.space4.works

Space4Works connects professionals with **underused workspaces**.

Through geolocated search and advanced filters, users can **book meeting rooms**, private offices, studios, or event spaces, with verified reviews, transparent pricing, secure payments, and **on-demand professional services**.

NerdInvest
www.nerdinvest.cards

NerdInvest uses its proprietary Knowledge Graph TCG to aggregate and structure information **on millions of cards**, variants, and market trends.

It combines free analytics, a **SaaS platform** with predictive models, and blockchain tokenization for fractional ownership of rare cards.

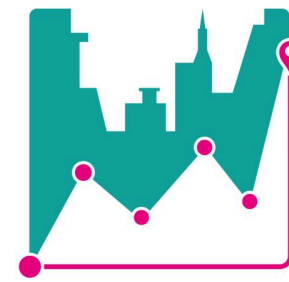

Some of our projects

CybuMedia
www.cybumedia.it

Advanced digital **signage** platform, designed for content display through a system of modular “tiles” screens, **adaptable** to any communication need.

Create and manage dynamic and **multimedia** contents, providing an immersive visual experience.

CityGame
www.citygame.tours

Born during the covid years to solve tour operator issues, it creates a real **virtual tour**, where tourists can explore cities using their **smartphone** as a guide.

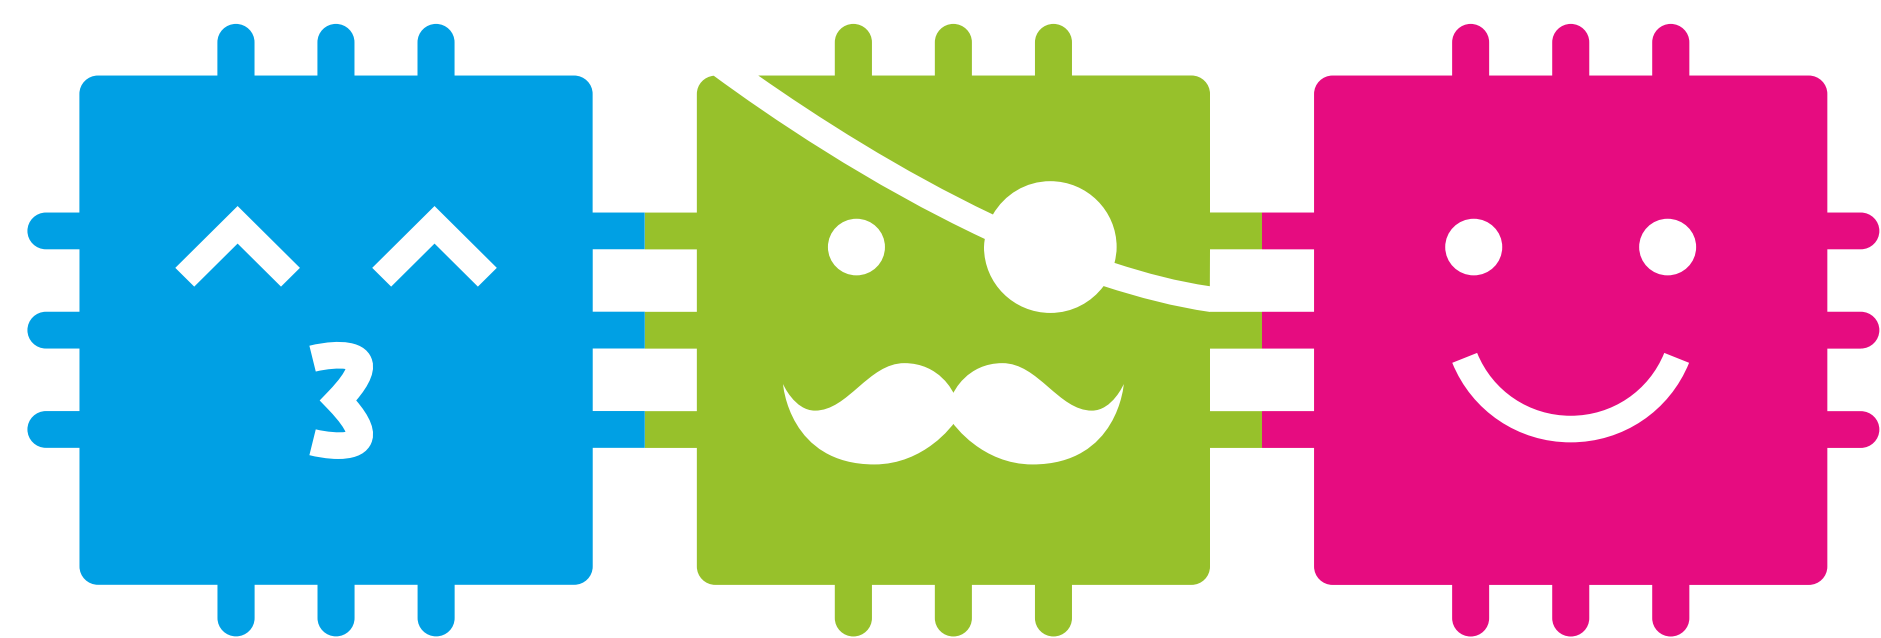

Simple and fast, it helps tourists **discover activities** and places in their own cities, through a platform that offers **information and guides** in its tours.

FlyTribu
www.flytribu.com

With the goal of delivering the same **training standard** within flight schools, FlyTribu offers a comprehensive and intuitive **management system** that allows for improved training **quality** and operational efficiency.

It provides flight schools with a competitive **advantage** by simplifying the experience for students and instructors.
